

NG·X

—
STRIKING, PRECISE
STABLE

NG·X

The all new NG•X is the professional machine the industry has been waiting for. Utilising the foundations of the X-one Models, we have completely redefined the look and created a visual masterpiece to offer a striking centrepiece for any establishment. Pushing the boundaries, the NG•X offers premium build, style and performance only previously available to the elite.

Striking design

Considered sharp styling, reducing all dimensions whilst maintaining performance the NG•X is at the very heart of the Conti portfolio.

New Group Design

The proprietary CONTI group has been given a performance overhaul, addressing layout and facilitating faster service, whilst increasing overall temperature stability by over 1 degree Celsius.

Colour Touch Screen Display

Full colour tft 3.2" touch display offering the barista full control over all machine features, making adjustments is now simple and intuitive.

Zero Compromise on Performance

Thermal balancing technology and boiler insulation have allowed us to lower power consumption but also increase capabilities and stability when the machine is pushed to the limit.

Flow Control

Unique 'Flow Control' system, this allows additional, small adjustments to be made to the group temperature, ensuring that coffee is extracted efficiently and consistently time and again.
